## Professional Summary

---

Cybersecurity student pursuing an Integrated B.Tech-M.Tech in Computer Science Engineering (Cybersecurity) with hands-on experience in digital forensics, DFIR, cloud security, threat detection, and cybercrime investigations. Skilled in Python, AWS, Linux, and security analysis through academic projects, cybersecurity labs, and practical training.

## Education

---

|                                                                          |           |
|--------------------------------------------------------------------------|-----------|
| <b>National Forensic Sciences University</b> , Gandhinagar, Gujarat      | 2022–2027 |
| Integrated B.Tech-M.Tech, Computer Science & Engineering (Cybersecurity) | CPI: 8.77 |

## Projects

---

**Windows Forensic Analysis Suite (v2.0)** Github  
Developed a DFIR tool to collect, analyze, and visualize 8+ Windows forensic artifacts across multiple OS versions, leveraging artifact correlation and session-based analysis to support user activity reconstruction and forensic investigations.  
**Technologies:** Python, Flask, Tkinter, SQLite, Matplotlib, ReportLab

**Cloud-Based Intrusion Detection System** Github  
Developed and deployed a cloud-native Intrusion Detection System (IDS) on AWS for real-time threat monitoring, automating event analysis and alert notifications to improve incident response efficiency by 40%.  
**Technologies:** Python, AWS Lambda, EC2, CloudWatch, SNS

**OT-CyberSim – Operational Technology Cybersecurity Simulation Environment** Github  
Built a simulated OT/ICS cybersecurity environment for attack-defense exercises and security testing, modeling industrial control systems and network infrastructure to demonstrate OT security concepts and threat scenarios.  
**Technologies:** Python, Linux, Docker, Bash, Networking, ICS/SCADA

## Experience

---

**Cybersecurity Intern, Uttar Pradesh Police, Amroha** Jul 2025  
Trained in cybercrime investigation, OSINT, digital forensics, ethical hacking, cyber threat analysis, cyber law, and incident response. Participated in hands-on cybersecurity labs, CTF challenges, and real-world cyber case studies, gaining practical experience in security investigations and threat detection.

## Technical Skills

---

**Programming & Technologies:** Java, Python, C++, JavaScript, HTML, CSS, MySQL, Bash, Linux, AWS, Docker

**Cybersecurity & DFIR:** Malware Analysis (Static & Dynamic), DFIR, Wireshark, Nmap, Burp Suite, MobSF, Autopsy, FTK Imager, Splunk (Basic), ELK Stack (Basic), PEiD, Dependency Walker, Process Monitor, Regshot

**Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration

## Certifications

---

- Google Cybersecurity Professional Certificate
- Fortinet Certified Fundamentals in Cybersecurity
- Fortinet Certified Associate Cybersecurity
- Google Crash Course on Python
- TryHackMe – Pre Security Learning Path

## Involvements & Leadership

---

- GDSC (NFSU) Member – Participated in technology and innovation-focused student initiatives.
- Active NSS Volunteer – Contributed to community outreach and engagement programs.
- House Captain – Led and coordinated school events involving 100+ participants.
